- Manufacturer's Standard Fabric Finishes include the Guilford of Maine FR701 line, the Guilford of Maine Anchorage line, and the Duramax line. Manufacturer's Standard Vinyl Finishes include the Omnova Solutions Sandown line and the Omnova Solutions Moondust line. Please visit our online finish gallery at www.perdueacoustics.com/fabric_finishes.html.
- Specialty fabric finishes may be selected, however; if the specialty fabric has not been tested on Perdue Acoustics products, we do require one (1) yard of fabric and two (2) weeks for testing to ensure the fabric will work with our manufacturing system (ensure the glue holds, the glue does not bleed through, the fabric still allows for acoustical transparency, etc.). Failure to provide Perdue Acoustics with the fabric and time to test the fabric before the order is put into production will void the panel warranty.
- Pricing is for 2016 delivery (or installation if quoted). Quotation is effective for 30 days.
- Total panel pricing includes mounting clips for the panels but DOES NOT include additional hardware necessary for installation (screws, glue, wire, etc.). Total installation pricing is for a turnkey installation and DOES include additional hardware necessary for installation (screws, glue, wire, etc.).
- Pricing does not include sales tax or field measurements (unless otherwise noted).
- Pricing includes ONE delivery (or installation if quoted). If jobsite is not ready to receive product or installation, customer will be responsible for additional mobilization and other expenses. Pricing does not include a lift gate upon delivery (unless noted).
- Customer will be responsible for verifying and ensuring jobsite is ready for delivery.
